

Internet Technologies – COMP90007 SM2 2018

“Pick your topic – Make it specific”

1. Introduction:

The introduction should state what the topic is about and which aspect of it will be covered in the report. **Do not pick a broad topic, rather *focus on a single aspect of the topic*** and work towards covering that properly.

Suggested questions to be answered:

- What is the general research problem in this area?
- What is the specific problem you are trying to solve?
- Why is this problem important?

2. Heading 1:

2.1. Sub-Heading 1:

This should delve into the primary concept of the topic and present to the readers the thoughts and/or working of the topic.

Suggested questions to be answered:

- What have been proposed so far by researchers/scientists to solve this problem?
- What are the state-of-the-art solutions?

3. Heading 2:

3.1. Sub-Heading 1:

This would present the various concepts represented under any given topic.

Suggested questions to be answered:

- What concepts/methods/techniques could be used to solve the problem?
- How these concepts/methods/techniques work?
- What are the pros and cons or similarity/dissimilarity of these concepts/methods?

4. Critical Analysis of the Topic:

This would be a good section to introduce in your report. Here you will talk about the advantages and disadvantages of your topic.

Suggested questions to be answered:

- How well these methods/techniques work in solving the problem?
- What are the results and impacts to solving the research problem?

5. Future Works:

Present a brief introduction as to the research you may wish to pursue on this topic in the near future.

Suggested questions to be answered:

- Anything can be improved on the methods/techniques?
- Any new techniques/methods can be proposed that might/could work well in solving the problem?

6. References:

- [1] Refer to established academic and research based resources like refereed conference and journal papers, for example publications in IEEEExplore, Elsevier sciencedirect, ACM digital library, industry white papers and Books. **Do NOT use Wikipedia as your reference.**
